About me

I'm Pacifique Nsabumukiza, a computer engineering student who aspires to collaborate with other passionate individuals in the field. My goal is to create autonomous web and embedded systems software that can drive innovation in technology, artificial intelligence, and robotics. Driven by challenges and innovation, I thrive in environments where I can integrate my engineering and computer system skills. I am eager to collaborate and learn continuously, always seeking opportunities and projects that allow me to make a significant impact and foster growth.

Experience

Turkish Maarif Foundation ▪ Istanbul, Türkiye

12/2024 – 12/2024

I was honored to participate in the 2024 Istanbul Education Summit organized by the Turkish Maarif Vakfı. This opportunity was a catalyst for exchanging ideas on making education more accessible globally, especially for marginalized communities. It was inspiring to learn from esteemed figures such as the President of the Republic of Türkiye and Prof. Dr. Birol Akgün, the President of Maarif Vakfı.

Kırıkkale University MOIC club Representative

12/2024 – present

Izmir University of Economics ▪ Ankara, Türkiye

12/2024 – 12/2024

I had the privilege of attending the Bioinformatics Bootcamp organized by the İzmir University of Economics. This transformative opportunity allowed me to delve into Python

programming for processing human genome information and explore the intersection of programming and genetic engineering.

web developer:

Self Employed

05/2023 – Present

I do testing, correcting errors, and detecting vulnerabilities which can make the website vulnerable for harm attacks.

Currently working as a web developer to build my own website, where everyone will be able to see my works without a lot of efforts.

DevTown

Self Employed

04/2023 – 05/2023

At the DevTown bootcamp focused on cloud computing, I was given a fantastic opportunity to delve deeply into the intricacies of cloud computing. I learned about how prominent companies such as Google Cloud, AWS, and Azure manage vast amounts of data storage. Furthermore, I discovered how to establish our own cloud storage online. Overall, the experience was filled with insightful skills that significantly broadened my knowledge in the IT field.

GASC-TUGIRAMAGARAMEZA - Muha, Bujumbura Mairie, Burundi

Volunteer

01/2022 – 04/2023

I had the opportunity to participate in a volunteer initiative led by our association, "GASC-TUGIRAMAGARAMEZA," to support individuals affected by the flooding caused by Lake Tanganyika's overflow. As a resident of the Kibenga quarter and a member of the association, I played an essential role in distributing much-needed supplies like food, clothes, mosquito nets, and medicines. Our efforts significantly reduced the number of people getting sick from diseases caused by dirt, and we helped students who lost their

materials in the flooding continue their studies uninterrupted. I am proud to have made a positive impact on their lives.

EDUCATION

Name of the University: Kırıkkale Üniversitesi

Major: Computer Engineering(**September/2023 – present**)

Name of the 2nd institution: TUJENGE SCOLARS PROGRAM

Major: SCIENCE studies & University preparatory

(**January/2022 – June/2023**)

Name of High School: Lake Tanganyika High school

Major: Biology, Chemistry, Math, physics , and Earth sciences

(**september/2015 – July/2021**)

COMMUNICATION

& LANGUAGES

SKILLS

1. **Kirundi:** native or bilingual
2. **English :** Advanced
3. **French:** Native or bilingual
4. **Turkish:** Advanced
5. **Kinyarwanda:** Advanced
6. **Swahili:** Elementary

CERTIFICATES &

RECOGNITIONS

1. Certificate of completion of Data intermediate analysis with python ▪ Arizona State University
2. Certificate of Participation:Türkiye Teknoloji Takımı Vakfı zirvesi
3. Certificate of completion of Google cloud computing course
4. Certificate of completion of Python course
5. Merit certificate of the Highest score in the National Exam
